# Changing Strings and Tuning Your Guitar

## How Do You Change Guitar Strings?

### How Do You Use a Guitar Tuner?

Those are 2 questions I heard so often, I've made this DVD to show how to change strings for Classical or Acoustic Guitars. It's not difficult, but if you haven't been shown, it's easy to do it wrong and the string can come out.

Tuners are easy to learn too. It's easiest to watch someone first, then you can confidently do it on your own.

**DVD & String Winder - \$15.95**

## Guitar Tuner and How to change guitar strings & use a tuner DVD with a String Winder

Here's all you need to keep your guitar in tune. I like this tuner because it has two options. You can either listen to the pitches or watch the needle to tune your guitar. The string winder helps you change strings much quicker and it also has a gadget to pop off pegs for steel-string guitars. The DVD walks you through how to change guitar strings and how to tune a guitar.

## Guitar Tuner and How to change guitar strings & use a tuner DVD with a String Winder - \$28.95

## Planet Waves Headstock Chromatic Tuner

This Headstock Tuner precisely tunes guitars, basses and many other stringed instruments by the instrument's vibrations rather than sound. Just clamp it to the head of your

instrument and, using a sensitive piezo transducer and back-lit LCD display, the Headstock Tuner allows you to tune quickly and accurately in noisy or dimly-lit rooms where many tuners fail. This is my favorite tuner!

Retail - \$49.99, discount - **\$29.99**

Easy to use automatic guitar tuner. Has a pitch pipe inside too so you can try tuning by ear first.

**Discount Price \$14.95**

# Pattern Piano & Keyboard

Would you like to be able to play any worship song on your Piano or Keyboard by ear?

The Secret is learning to play using "Rhythmic Patterns"

This is how guitar players learn. They learn a few simple strumming PATTERNS and a few simple chords and they are enjoying music right away.

Most piano or keyboard lessons focus only on reading music. Reading music is good to know, but if the notes aren't written down or you want to change the key, with only knowing how to read, you can't do it.

Learning to play with RHYTHMIC PATTERNS frees your playing. You can use patterns to play all styles of music. It's especially freeing for worship leaders. Plus, 'RHYTHMIC PATTERNS' are equally effective whether you play the Piano or the Keyboard.

Finally set your hands free! Whether you're an absolute beginner or a seasoned pro who would like to learn to play BY EAR, you'll learn to use contemporary 'RHYTHMIC PATTERNS' that are very effective whether you're playing solo or within a band.

There are so many songs in contemporary worship, a drummer might think it's impossible to learn them all. Carl Albrecht has taken on this monstrous task in order to show you how to prepare for the grooves of worship. After analyzing the top 100 CCLI Worship songs (www.ccli.com), Carl found that there are only "7", essential types of drum patterns used in modern worship. Even though there are arrangements to learn according to each song the basic elements for drummers are not overwhelming. Even though the teaching is designed for the beginning to intermediate player, even advanced drummers will find this conceptual teaching to be a helpful resource in their continued learning. Once you've grasped these basic drum feels you'll be equipped to learn any modern worship song.

# 5 Tips for The Christian Guitarist

## 1. PRAYER.

The first tip is to start your practice sessions with prayer. It's so simple, but so easy to forget to do.

Prayer has two sides. Not only does God want to help us through this life, He wants us to do everything to His Glory.

Ask Him to help you learn the instrument. You can ask Him for help with certain chord changes, etc. Then play for him... even your practice.

## 2. RELAX

It takes a lot of weight to hold down the strings of a guitar, especially for bar chords. But, not more than what's needed to get a good sound.

Most students hold too much tension in their hands. It's no wonder it's difficult for them to change quickly or get a good sound.

A good way to release unnecessary tension is to start with relaxing your face. Consciously relax your face and shoulders while you play. That will help your fingers too.

## 3. LEFT HAND

The best position for your left hand is when your hand is parallel to the neck. You want to have the pinky side of your hand as close to the neck as your first finger side.

Many beginning guitar players hold their hand with the first finger side close to the neck, but the pinky side is an inch or more away.

## 4. RIGHT HAND

Relax! Most people hold too much tension in both hands. If you're playing an arpeggio pattern, only use energy for the stroke. Your fingers should fall back down with no tension.

For strumming patterns, you're hand should be like a wet rag... relaxed.

## 5. FOCUS AHEAD

A simple way to flesh this out is by looking at where the finger will go next. For example, if you're playing chords in the first fret, but are going to move to a chord higher up on the neck... look at the frets you're moving to, not where your hand is now.

You'll get to the new chord with more accuracy. If you're learning a new chord, try to visualize the chord before you change.

Think ahead to the next chord, next measure. Think ahead to where your fingers are moving. Only look, if you watch your hands, to where you're moving too.
