At a large music trade show a company from China approached me. Usually I don't like the quality of guitars from China, but I was impressed with their instruments. They told me they had purchased the tooling from Japan.

That made sense! Japanese make very good guitars. These instruments are now available at this web site. They have the quality of a good Japanese guitar at Chinese prices. They will be shipped in a sturdy shipping box.

Play Piano By Ear

Would you like to be able to play any worship song on your Piano or Keyboard by ear?

The Secret is learning to play using “Rhythmic Patterns” This is how guitar players learn. They learn a few simple strumming PATTERNS and a few simple chords and they are enjoying music right away.

Most piano or keyboard lessons focus only on reading music. Reading music is good to know, but if they notes aren't written down, they can't play. Or if someone wants a song sung in a different key, they can't do that either.

Learning to play with RHYTHMIC PATTERNS frees your playing. You can use patterns to play all styles of music. It's especially freeing for worship leaders

“RHYTHMIC PATTERNS” are equally effective whether you play the Piano or the Keyboard.

Finally set your hands free! Whether you're an absolute beginner or a seasoned pro who would like to learn to play BY EAR, you'll learn to use contemporary “RHYTHMIC PATTERNS” that are very effective whether you're playing solo or within a band.

You can hear a sample at WorshipGuitarClass.com/piano.html

Drum Grooves for Worship

There are so many songs in contemporary worship, a drummer might think it's impossible to learn them all. Carl Albrecht has taken on this monstrous task in order to show you how to prepare for the grooves of worship. After analyzing the top 100 CCLI Worship songs (www.ccli.com), Carl found that there are only "7", essential types of drum patterns used in modern worship. Even though there are arrangements to learn according to each song the basic elements for drummers are not overwhelming.

Even though the teaching is designed for the beginning to intermediate player, even advanced drummers will find this conceptual teaching to be a helpful resource in their continued learning. Once you've grasped these basic drum feels you'll be equipped to learn any modern worship song.

Drum Miking Made Easy

Getting a great drum sound is one of the toughest jobs for even the best engineers. Session and touring drummer, Carl Albrecht from Nashville, along with Doug Gould of Shure and Mike Overlin of Yamaha carefully explain the tricks of the trade. This top trio of clinicians take the mystery out of drum "soundology". Besides each being an accomplished player, they also have taken the time to explore and understand the technical side of drum audio.

Vocal Warm-up CD

Audio CD designed to assist the vocalist in completing a basic warm-up of their vocal apparatus prior to rehearsing or performing. If you get one program, I recommend 'Set Your Voice Free.' Then get this one for variety. I use it and love it too. It has other exercises to relax your mouth, for example the 'motor boat' sound.
